3. [java 64 bit](#)

The OS/X Mavericks ships with Java 1.6, but in case you've installed another version, you can get back with 1.6 if you download a bundle of Java SE 1.6.0_65 from Apple. If you've installed a later version of Java, e.g., this page describes how to install and uninstall JRE 8 on OS X computers. Note: The JRE installation includes the JavaFX Runtime which is incorporated into the same directory structure. In OS X 10.7 (Lion) and later, the Java runtime is no longer installed automatically as part of the OS installation.
